Subject: Re: Public Notice of EPA Clean Water Act - NPDES Permit for StarKist Samoa Tuna Cannery in American Samoa

Talofa Pascal,

Thank you for the notification. AS-EPA will review and share public notice to any interested parties.

Thank you,

The U.S. Environmental Protection Agency, Region 9 (USEPA) is issuing a notice of proposed action under the Clean Water Act (CWA). You are receiving this E-mail as a local regulator whose agency may be interested in commenting on the proposed permit reissuance. Please forward this message to any interested parties you may be aware of.

The USEPA is proposing to reissue a National Pollutant Discharge Elimination System (NPDES) permit, AS0000019, to:

StarKist Samoa Tuna Cannery
368 Atu'u Road, Pago Pago, American Samoa 96799

The StarKist Samoa Tuna Cannery processes frozen whole tuna that are canned as tuna fish for human consumption and pet food. It also processes fish by-products into fish meal and other products. The cannery discharges an average of 2.4 million gallons per day of treated industrial wastewater to the eastern side of outer Pago Pago Harbor. EPA is proposing to update and renew the facility's wastewater discharge permit.

For documents and details of the proposed action, please see EPA's website at
